

I-405 Freeway Widening Project

BULLET POINTS

On June 12, 2012, City staff held a public meeting at the Seal Beach Tennis Center to discuss Orange County Transportation Authority's (OCTA) I-405 Freeway Widening project. At the meeting several residents requested the below bullet points summarizing impacts on the project.

When submitting your comments to OCTA on the Environmental Impact Report (EIR), we recommend you submit individually with unique comments. As part of the EIR response process, OCTA is required to respond back to each individual received comment. Each letter will be analyzed by OCTA to identify specific comments to the EIR. Responses will be provided for each comment that raised a **significant** environmental issue or an issue related to the adequacy of the EIR. We encourage you to:

- raise significant environmental issues
- do not use opinions or personal emotions
- state facts
- request additional information if needed.

Additionally, comments which express a preference for an alternative, or which argue for or against approval of the proposed project, but which do not raise substantial issues under CEQA, do not require a CEQA response. These comments are responded to with a "comment noted or acknowledged" reference.

Bullet Points

- *Impact to Almond Avenue (soundwall relocation, loss of landscaping, loss of parking, relation of utilities, etc.)*
- *Bottleneck of the freeway as it approaches Los Angeles County.*
